

COMPREHENSIVE BUSINESS INTELLIGENCE SOLUTION BY SONAWANE

Sonawane's cutting edge BI/DW service offerings deliver high quality, scalable solutions while leveraging onsite and offsite teams to optimize client value. Sonawane delivers a full spectrum of services for BI projects that spans technology, platform and solution consulting. The Federal Service Offerings are broadly classified into three areas, namely Consulting Services, Customized BI Development and Application Management.

All these BI services are delivered with SLA commitments and are based on Sonawane's Delivery Model, characterized by mature processes, standard methodologies and an optimal onsite offsite mix.

Customized BI Development

The Customized BI Development services design, construct and implement a complete BI/DW solution. The service delivery begins with a requirement analysis phase and completes with the implementation of the BI/DW solution as per the requirements. The services can be configured to deliver a specific component, such as Data Modeling, ETL, Data Mart building, customized reports development and dashboards of an end-to-end BI/DW solution. Key services offered include:

- BI Architecture Design
- Data Modeling
- ETL Strategy
- Presentation Strategy
- Performance Management
- Metadata Management
- Report Security

Application Management

The Application Management services support a BI/DW implementation through the entire lifecycle and include services such as:

- 24x7 Production Support
- Maintenance
- Application Migration
- Performance & Tuning
- Application PulseCheck

Customized BI Development

The Customized BI Development services design, construct and implement a complete BI/DW solution. The service delivery begins with a requirement analysis phase and completes with the implementation of the BI/DW solution as per the requirements. Key services offered include:

- BI Architecture Design
- Data Modeling
- ETL Strategy
- Presentation Strategy
- Performance Management
- Metadata Management
- Security

Consulting Services

Sonawane's Consulting Services comprise low-risk, high-impact, short-cycle diagnostic and assessment studies that facilitate the execution of a client organization's BI/DW initiative at its various lifecycle stages. The services help client's articulate problem definition and then propose alternate solutions and best practices, and recommend an implementation plan considering short medium and long-term priority/business objectives. The deliverables enable clients to take quick and well-informed decisions for the success of the BI/DW initiative. Sonawane's senior BI/DW experts deliver the service using a well-defined roadmap that leverages various industry standard methodologies and tools.

Key services offered include:

- Readiness Assessment
- Data Quality Assessment
- BI Tools Standardization
- Data Mart Consolidation
- BI Workshop
